

About Wealtheon

Wealtheon Group is a family-run company that focuses on wealth management. Through Wealtheon Asset Management, the investment portfolios of the family and shareholders are managed by investing directly in listed equities, bonds and index tracker funds.

This investment strategy was made available to third party investors in 2008. Wealtheon Asset Management currently manages approximately € 500 million for 140 European families. Wealtheon is not a bank: its investment policy is entirely transparent, flexible and safeguarded from any possible conflict of interest.

Wealtheon is a 100% independent asset management company that is accredited by the FSMA (Belgium), AMF (France), AFM (Netherlands), CSSF (Luxembourg) and SAAM (Switzerland). Wealtheon manages assets on behalf of private and institutional clients by investing solely in equities, bonds and ETFs. Wealtheon's investment policy does not include vehicles such as investment funds, structured products and mutual funds. Wealtheon Asset Management was founded in 2008 and is derived from GIM Algemeen Vermogensbeheer (founded in 1971), which managed almost 5 billion euros from offices based in the United States, the Netherlands and Switzerland.
